Purpose

The purpose of this Visual Design Guide is to define how the Pivot Teamwear (Pivot) brand is applied across customer-facing digital experiences and supporting visual assets.

The guide translates the principles established in the Pivot Brand Kit into practical standards for websites, club stores, digital customer experiences and related assets.

It ensures Pivot maintains a consistent, professional and recognisable customer experience while allowing sporting clubs to present their own identity through dedicated club-branded experiences.

Scope

This guide applies to:

- Pivot website applications.
- Customer club stores.
- Digital customer experiences.
- Product presentation.
- Supporting customer-facing visual assets.

This guide does not replace the Pivot Brand Kit, product specifications or operational requirements.

Relationship to Brand Kit

The Pivot Brand Kit defines:

- Brand identity
- Messaging
- Logo standards
- Colour palette
- Typography
- Photography principles

- Digital application principles

This Visual Design Guide defines how those standards are applied within customer-facing experiences. The Brand Kit remains the primary reference for Pivot brand decisions.

Visual Design Principles

All Pivot customer-facing experiences should reflect the following principles:

PRINCIPLE	DESCRIPTION
Simple	Present information clearly and make customer actions easy to understand.
Professional	Maintain consistent presentation and attention to detail.
Practical	Prioritise usability and customer outcomes over unnecessary complexity.
Consistent	Apply approved standards across all customer touchpoints.
Customer-focused	Design experiences around the needs of clubs, players and supporters.

Pivot Website Design

The Pivot website represents the Pivot brand and provides information about Pivot's teamwear solutions, products and services. The website should communicate:

Who Pivot is	How Pivot supports sporting clubs
The benefits of the Pivot service model	Available products and solutions

Website Branding

The Pivot website uses Pivot branding. Applications include:

Pivot logo	Pivot colour palette	Pivot typography
Pivot messaging	Pivot photography principles	

The website should follow the approved Brand Kit standards.

Product Presentation

Products displayed on the Pivot website should:

Be presented consistently	Use accurate product information
Clearly communicate product features and options	Maintain professional visual presentation

Product presentation may include:

Product photography	Supplier imagery
Approved mock-ups	Pivot-controlled product photography

Club Store Design

Club stores provide each sporting organisation with a dedicated ordering experience for their approved apparel range. Club stores are designed to allow players, families and supporters to immediately recognise and engage with their club.

Club Store Branding

Club stores are primarily club-branded experiences.

Club stores may include:

Club logo	Club colours
Approved club branding assets	Approved product designs

The club provides existing branding assets for application within the approved Pivot framework. Pivot does not create or replace club identities.

Club Store Design Framework

Club stores use controlled visual templates to maintain consistency, efficiency and scalability. The design framework provides limited variation while allowing clubs to maintain their identity.

Approved Themes

Light Theme uses:

Primary club colour	Secondary club colour	White background
Dark text	Club logo	

Dark Theme uses:

Primary /dark club colour	Secondary club accents	White text
Club logo		

Customisation Principles

Club store customisation is achieved through:

Club branding	Approved colours	Approved products
Approved apparel designs		

Club stores do not include:

Fully customised website layouts	Unlimited design variations	Custom themes outside approved options
----------------------------------	-----------------------------	--

Apparel Design Application

Design Principles

Pivot apparel designs are created through approved templates and controlled design processes. Clubs may customise approved options including:

Colours	Club branding	Player names
Numbers	Sponsors where applicable	

Design outcomes must remain consistent with:

Product specifications	Manufacturing requirements	Applicable sport and competition requirements
------------------------	----------------------------	---

Design Approval Principles

Club apparel designs are subject to Pivot review to ensure they meet applicable sport, competition, manufacturing and content requirements sample production.

Sponsor Branding

Sponsor branding is an optional apparel design element. Sponsor branding:

Applies to approved garment designs only	Does not form part of the club store branding framework
Must comply with applicable requirements	

Product Imagery Standards

Pilot Approach

During the pilot phase, product presentation may use:

Supplier imagery	Approved mock-ups	Available product assets
------------------	-------------------	--------------------------

Future Approach

As Pivot develops its product library, product imagery should transition toward Pivot-controlled photography and assets. The objective is to create consistent product presentation across all customer experiences.

Digital Content Standards

Digital customer experiences should follow Pivot's established brand voice:

Clear	Professional	Approachable	Practical
-------	--------------	--------------	-----------

Content should:

Make customer actions clear	Avoid unnecessary complexity	Provide useful information
Support a simple ordering experience		

These principles align with the Pivot Brand Kit.

Asset Ownership Principles

Pivot-Owned Assets

Pivot retains ownership of:

Design templates	Design frameworks	Reusable visual assets
Product templates	Systems and processes used to deliver teamwear solutions	

Ownership of Pivot templates and systems does not transfer through the creation of club-specific designs.

Club-Owned Assets

Clubs retain ownership of:

Club logos	Club colours	Club branding assets
Sponsor assets provided by the club or sponsors		

Club-Specific Designs

Approved club-specific apparel designs remain specific to that club and may only be used by Pivot to support that club's teamwear requirements. Pivot may:

Retain production files.	Manufacture approved products.
Support future ordering and updates.	

Pilot Application

The Phoenix pilot will be the first application of this Visual Design Guide.

The pilot will validate:

Website presentation	Club store experience	Product presentation
Customer usability	Design processes	

Learnings from the pilot may be incorporated into future versions of this guide.

Related Standards

This document forms part of the broader Pivot Teamwear business management system and should be read in conjunction with applicable approved standards, policies, procedures, governance documents and supporting documentation.

Related documents may include:

- Brand standards.
- Business and operating standards.
- Customer and commercial documents.
- Product and manufacturing standards.
- Digital and technology standards.
- Other applicable governance documentation.

Where requirements overlap, the document with primary responsibility for the subject matter takes precedence.

As Pivot evolves, additional standards and supporting documentation may be developed to address specific business, operational, customer or digital requirements.
